Übung 12 – Mensch-Maschine-Interaktion 2

Exercise 12: Java Programming on Mobile Phones

Implementing a vocable trainer in J2ME

Write a small J2ME application which realizes a vocable trainer with the following functions:
- add a new dictionary entry
- show German word → request English word
- show English word → request German word

On the exercises website, you can find the slides of a tutorial [1] which was given in exercise 11. This tutorial includes also some J2ME-applications which might be used for the implementation of your vocable trainer.
