Supervisor: Yaxi Chen

Responsible Professor: Prof. Dr. Andreas Butz

# Outline

- ≡ Motivation
- ≡ Related Work
- ≡ Concept
- ≡ Online Survey
- ≡ Current Status & Further Directions
  - ≡ Expert Group
  - ≡ 30-sec Clip
- ≡ Next Steps
- ≡ Questions & Discussion

# Motivation

- ≡ Thumbnail: People can tell what one photo is about
- ≡ Musical Thumbnail: Musical overview of a song  
(visual / acoustic)
- ≡ Meaningful Design  
(consistent mapping including transparency and traceability)
- ≡ Current content analysis of music works not well enough
- ≡ Integrate User feedback to improve performance
- ≡ Motivate people to make contribution

Music Icons: Procedural Glyphs for Audio Files

# Related Work

≡ Tzanetakis and Cook [ISMIR, 2000]: Audio Information Retrieval (AIR)

# Online Survey with visual thumbnails

- ≡ Comparison of these 4 concepts: Are they working ?
- ≡ Simplifying concept of SemantIcons:
  - ≡ Colour of receptacle: Genre (for surveying purposes no direct assignment of genre)
  - ≡ Amount of petals: Tempo (4 - slow, 8 – medium tempo, 16 - fast)
  - ≡ Shape of petals: Aggressiveness (round – calm, curved – aroused, tapered – aggressive)

# Online Survey - Demography

- ≡ Target Group: Mainly Last.FM Users
- ≡ Participants: 38 valid (80)
- ≡ Age: 18 - 53 (ø age: 26,6)
- ≡ Gender: 24% female, 76 % male
- ≡ Nationality: US, UK, Can, Cro, NL, F, Ger, GR, N, P, Rus, Esp, Swe
- ≡ Occupation: 50% Student, 32% Employee, 18% Unemployed/Self-Employed

# Online Survey - General experience

- ≡ How often listen to music: 70% > 3 hours/day
- ≡ Experience in music: 66% 4 or 5 (1-5 scale)
- ≡ Quite familiar with music related terms overall
- ≡ Discovering new music: Others' recommendations 66%, Popular Lists (Billboard Charts)76%, Web pages 74%
- ≡ Methods to get overall impression of a song:
  - ≡ 30-sec Clip: 67% 4 or 5
  - ≡ Similar Artists/Tracks 42% 4 or 5
  - ≡ Top tags : 34% 4 or 5
    - ≡ Genre : 18% 4 or 5
  - ≡ Visual thumbnail: 13% 4 or 5

# Online Survey - Visualization

Familiar with most songs presented

Which song is represented by this Visualization ?

- ≡ Histogram: 23,7% Nirvana – Smells like Teen Spirit
- ≡ ArcDiagram: 21,1% Beastie Boys - Fight for Your Right
- ≡ SemantIcon: 36,8% Miles Davis – So What
- ≡ TimbreGram: 31,1% Red Hot Chilli Peppers - Scar Tissue

# Online Survey - Visualization

Which of the 4 Visualizations displays this song ?

- ≡ 4 Histograms: 42,1% Police - Message in a Bottle
- ≡ 4 ArcDiagram: 26,3% Joy Division – Love will ..
- ≡ 4 Semanticons: 44,7% AC/DC – Highway to Hell
- ≡ 4 TimbreGram: 21,1% U2 – One

Which Genre is represented by these 4 visualizations ?

- ≡ 52,6% Rock (6 options)

# Online Survey - Result

- Loss of participants: 9 quitted before visualization part, 33 skipped
- 27 of 38 dislike any visualization

Is this visualization helpful to get the following information?

# Current Status & Further Directions

- ≡ Shift Target Group: from normal users who have no professional knowledge with music to professionals who practically analyze the content, structure or composition of songs.
- ≡ Acoustic thumbnail (30-Second Clips): it is claimed in the survey that most of participants rate 30-mins clip is most helpful for understanding an unknown song.

# Next Steps – Expert Interviews

- ≡ Information which can be extracted from visual or acoustic content.
- ≡ Is visual information helpful?
- ≡ Current methods of teaching/learn professional knowledge.
- ≡ Are there problems or difficulties with current methods?
- ≡ Will our visualization concepts help?

If we get some positive Feedback  
Target group as professionals and produce visualizations for them

# Questions & Discussion
