Practical Course Development of Media Systems
Prof. Dr. Hußmann (lecturer), Gregor Broll, Alexander De Luca, Max Maurer (supervisors)
Summer Term 2010

Exercise 1 – Introduction to Android

Exercise

The goal of this exercise is to help you get started with the Android SDK [1] and to introduce the basics of developing Android applications.

- Download and set up the Android SDK [1] on your computer, install the Eclipse IDE [2] and connect it with the Android SDK using the Android Development Tools (ADT) plugin [3]. Finally add the 2.1 platform to your ADT plugin.
- Have a look a the Android documentation (online or part of the SDK) and make yourself more familiar with Android.
- Implement the Hello Android-example and add a picture to the screen. You can download the picture from the website of the practical [4].

Submission

- Submit your own solution using SVN .
- Create your personal folder „nachname" in the SVN-repository of your group .
- Create a folder for the exercise named „exercise1" and put all source files there .
- Submit your solution until Wednesday, **05.05.2010, 12 p.m**.
