Exercise 5 – Mensch-Maschine-Interaktion 1

Developing a Storyboard

Thereby execute the following steps together with your group (3/4 people):

1. **Scenario of use** (optional)
   Based on the interviews data, describe a realistic description of users'
   actual behavior in respect to the problem space (casual sport activities).
   Pick a day, a location, real users with names and profiles, describe their
   activities including both usual and exceptional situations with planed
   activities and surprises coming in the way.

2. **Design scenario**
   Based on the previous scenario, incorporate your design ideas coming
   from the brainstorming. The purpose here is not to describe how the
   system you are developing should work but rather to focus on the context
   in which would be used, for which purpose, with whom, under which
   conditions.

3. **Storyboard**
   Based on the Design scenario create a storyboard illustrating the
   situations.

Submission:

- Submit the summary of your five ideas, your best idea including the
  reason for this decision and your scenario (all in one **PDF**) via UniWorx.
- Deadline: 14.06.2012 13:00
  (**Late submissions** or submissions via eMail and any other format than
  PDF will not be accepted!)
