SESSION 6

User Experience Design I - SoSe 2019

Evaluation

How would you evaluate your current concepts?

What methods would you use?

Group-Task

Create an outline for a structural approach to evaluate your ideas.

- What is the hypothesis?
- What are options for evaluation methods for the current state of development?
- How well does your current paper prototype consider the 10 Usability Heuristics?
- How could a long-term plan look like?

Homework

Rework your design of the wireframes to match the 10 usability heuristics.

Try to evaluate your design before and after with the usability heuristics.
