Double Diamond

Why? and How?

source: [8]

An original type, form, or instance that serves as a model on which later stages are based and judged.

American Heritage Dictionary

source: [1]

Three main goals

- 1.) Exploring a context
- 2.) Examining design problems
- 3.) Evaluating solutions

Three main contexts

- 1.) Screen based interactions
- 2.) Interactive products
- 3.) Technology enabled services

role

For the Designer:

Exploration
Visualisation
Feasibly
Inspiration
Collaboration

look 'n' feel

For the End User:

Effectiveness / Usefulness
A change of viewpoint
Usability
Desirability

implementation

For the Producer:

Conviction
Specification
Benchmarking

source: [5]

Fidelity v. Resolution

low resolution
low fidelity

high resolution
low fidelity

high resolution
high fidelity

resolution = amount of detail
fidelity = closeness to the eventual design (product/service)

source: [5,6]

Some Examples from Design Workshops

@ LMU Medieninformatik
+ TUM Industrial Design
+ TUM Architecture Informatics
+ LMU Art & Multimedia

Design Workshop II

Design Workshop II

Design Workshop II

In conjunction with B/S/H (Neff)

Home Appliances

- 12 MA Media Informatics Students
- Duration: One semester
- Topic: Tactile Feedback

Prototypes

Prototypes

Prototypes

Design Workshop II

In conjunction with Acelik

Home Appliances

- 16 MA Industrial Design Students
- 14 MA Human-Computer Interaction Students
- Duration: One semester

Reminding Water Dispenser

Pure Air

Dirt Buster

Recipe Printer

HoverMeasure

Design Workshop II

in conjunction with Gewofag Munich

- 4 MA Architecture (TUM)
- 12 MA Human-Computer Interaction Students (LMU)
- Duration: One semester

The Mapped Show

Smart City Table ist ein Projekt, mit dem die Kommunikation und Visualisierung anhand von Architekturmodellen verbessert werden soll. Es handelt sich um ein ferngesteuertes Tool, mit dem Diskussionen gesteuert und visualisiert werden können. Dabei stehen hohe Flexibilität durch einfache Austauschbarkeit der Modelle und Vielseitigkeit im Vordergrund. Die hier dargestellte Demoversion bietet die grundlegenden verschiedenen Modi an.

StreetView Game

StreetView Game

It's really hard to design products by focus groups. A lot of times, people don't know what they want until you show it to them.

Steve Jobs

Horizontal vs. Vertical Prototype

80/20 rule

A principle for setting priorities: users will use 20% of the features of your product 80% of the time. Focus the majority of your design and development effort (80%) on the most important 20% of the product.

PAPER PROTOTYPING POP

Video-demo

<https://www.youtube.com/watch?v=EGp20lVwUa8>

PAPER PROTOTYPING POP

- choose from a wide range of interface modules
- import your sketched wireframes
- turn sketches into clickable prototypes

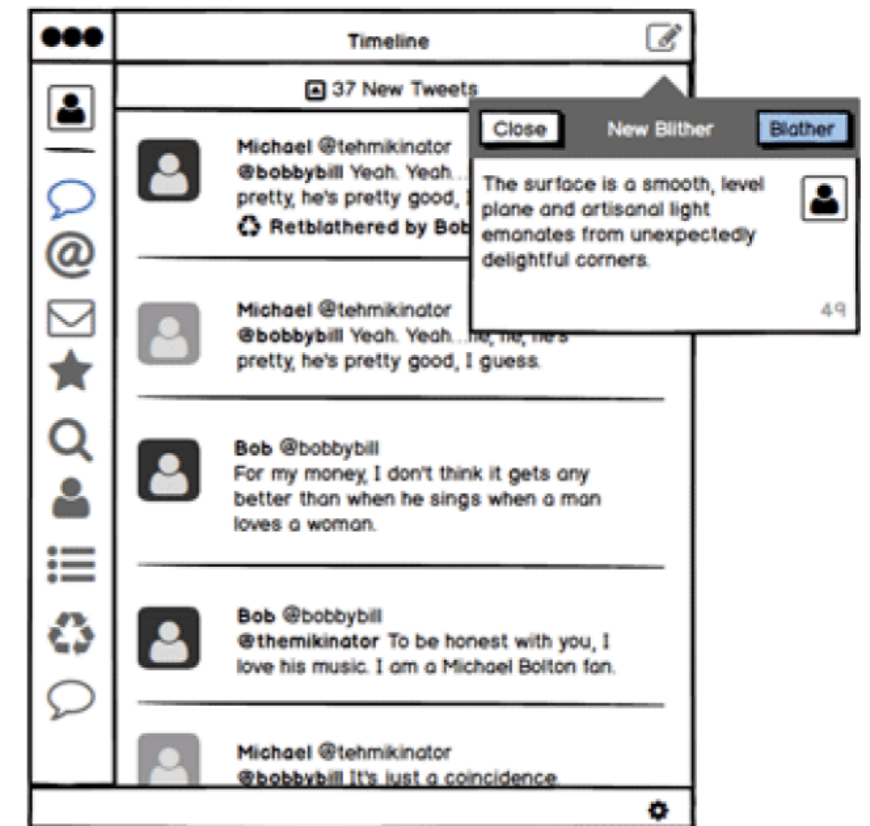

PAPER PROTOTYPING BALSAMIQ

PAPER PROTOTYPING BALSAMIQ

- choose from a wide range of interface modules
- create fast low fidelity clickable prototypes

POP VS. BALSAMIQ

POP

- + Use your own sketches
- + Fast and easy prototyping
- Limited UI elements

BALSAMIQ

- + Create new mockups directly from the “Create New” menu
- + Simply click to edit wireframes
- + Sketch-based wireframes allow designers to focus on functionality
- + 30 days free trial
- Limited functionality

Overview Prototyping Tools

Low Fidelity

- POP
- Balsamiq

Mid Fidelity

- Sketch
- Proto.io
- Pixate
- axure
- Mockplus

High Fidelity

- InVision
- Marvel
- Justinmind
- Framer
- Adobe XD

Homework

Create your first low fidelity prototype

Each group has to create one functional low fidelity prototype with multiple use cases (one use case per student) to click through. Record a short video-clip demonstrating the "implemented" functionalities and interconnections of the single wireframes.
